

CASE STUDY

HARMONY DOORNKOP - MINE SCADA UPGRADE

2026

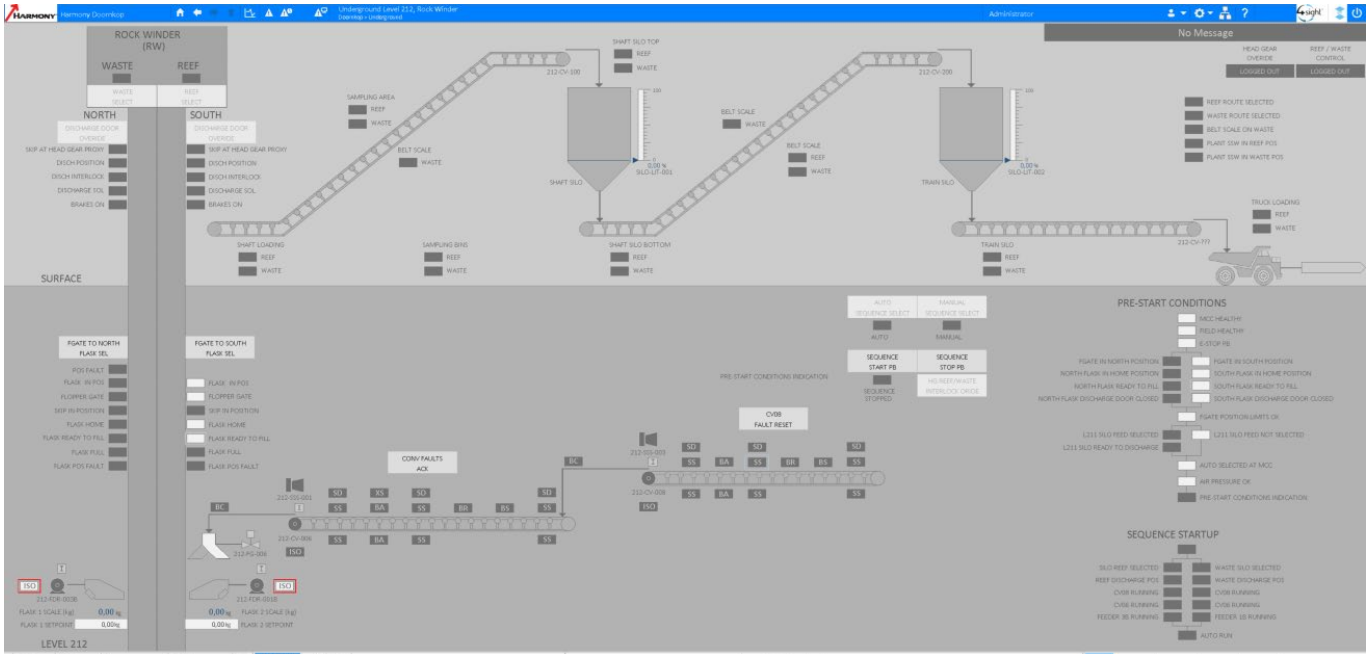

CUSTOMER SUMMARY

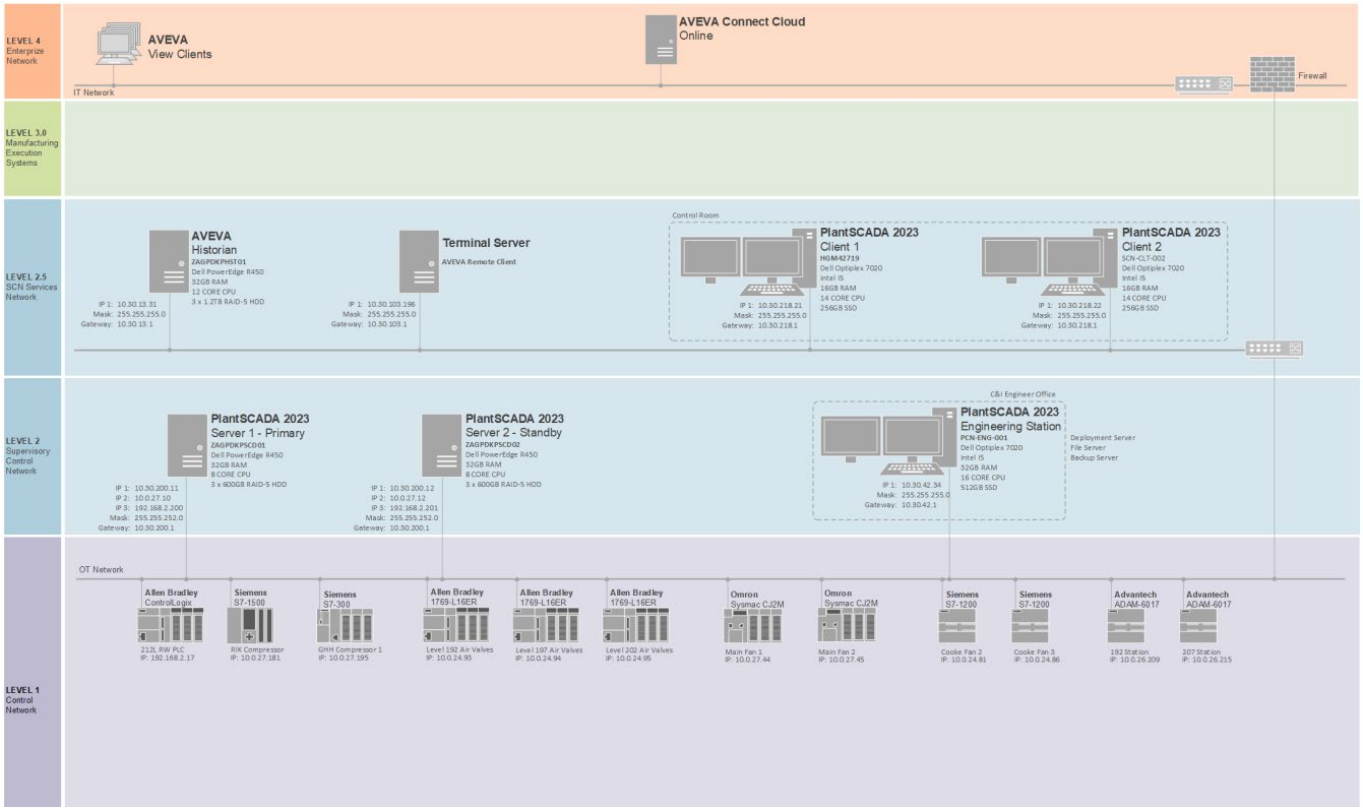

Doornkop is a deep-level, single-shaft operation in Gauteng, some 30km west of Johannesburg, on the northern rim of the Witwatersrand Basin. While a mature operation, Doornkop still has 15 years life-of-mine remaining and is focused on narrow-reef conventional mining of the gold-bearing conglomerate South Reef. Ore is processed at the Doornkop plant, which uses the carbon-in-pulp process to extract gold

CHALLENGES

The primary objective of this project is to migrate the existing Adroit SCADA system to AVEVA™ Plant SCADA and to upgrade the server infrastructure to support the new SCADA system. This migration aims to enhance the system's functionality, improve reliability, and provide better integration capabilities with modern industrial automation standards.

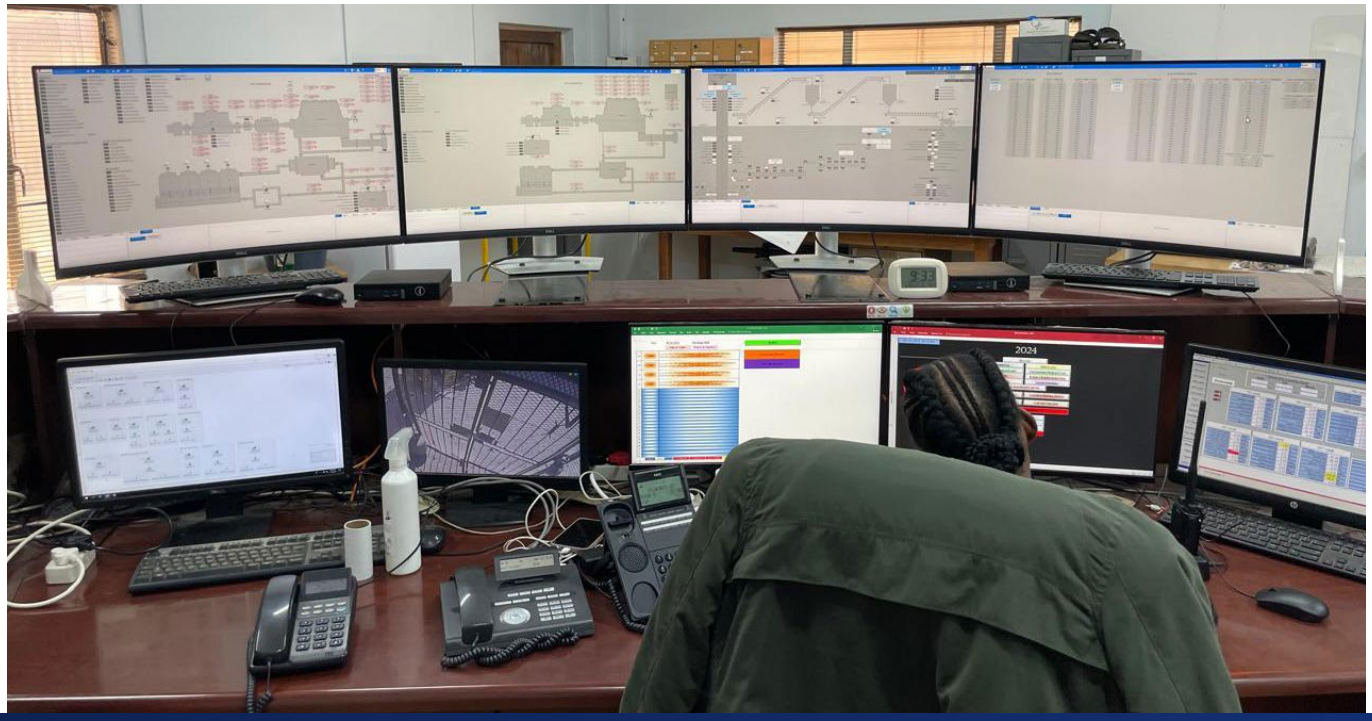

SOLUTION

BENEFITS AND OUTCOMES

Modernised SCADA system that enhances operational efficiency, provides reliability, offers improved integration capabilities with the latest industrial automation technologies, and forms part of the Harmony Gold AVEVA™ Flex Program. The project allows for more visibility, reporting, and management of the current installation base on Doornkop Shaft.

4Sight Holdings Limited (4Sight) is a multinational, diversified technology group listed on the General Segment of the Main Board of the JSE (ticker: 4SI). Our purpose is to leverage our extensive products and services portfolio, focused on AI technologies, people, and data-focused solutions, to design, develop, deploy and grow solutions for our partners (customers and vendors).

The company's mission is to empower our partners to future-proof their businesses through Digital AI Transformation to make better and more informed decisions in the modern digital economy.

4Sight's business model enables its partners to take advantage of products and solutions within its group of companies, which will allow them to enjoy turnkey Digital AI Transformation solutions across industry verticals.
